

# ANKUR THAKKAR

Senior IT & Digital Transformation Leader

## Experience

**Senior Product Owner – Enterprise** Sep 2021 - Present

**Applications & Digital**

**Transformation**

**Emirates National Facilities**

**Management LLC**

- Directed the end-to-end delivery of multiple digital products and enterprise platforms valued at over AED 7M, translating business strategy into product roadmaps and delivering customer-centric solutions that consistently met Agile release milestones while balancing commercial, customer, and technology priorities.
- Increased digital customer adoption by 35%, reduced process turnaround time by 40%, and improved Net Promoter Score (NPS), data-driven product strategy, backlog optimization, user research, workflow automation, and continuous product enhancements.
- Built and led cross-functional Agile product teams across Engineering, UX/UI, Data Analytics, Architecture, and Commercial functions, embedding Lean Product Management, evidence-based prioritization to accelerate delivery, improve collaboration, and maximize business value.
- Prioritized product backlogs using customer insights, market analysis, MoSCoW prioritization, performance analytics, delivering high-value features faster while increasing user engagement, operational efficiency, and business value.
- Established product governance, KPI frameworks, and continuous improvement practices and partnering with senior stakeholders to ensure strategic alignment, regulatory compliance, effective risk management, and sustainable product growth.
- Led enterprise-wide CAFM digital transformation initiatives, modernizing Facilities Management operations predictive workflows, and technology-driven solutions that improved service delivery, asset lifecycle management, maintenance efficiency, and customer experience.
- Defined and executed the enterprise digital transformation roadmap, automation, product innovation, and technology strategy with business objectives to drive operational excellence across multiple business units.
- Owned the complete product lifecycle, including roadmap planning, backlog prioritization, requirements gathering, user story definition, release planning, and collaboration with development teams to deliver business-focused digital solutions.
- Led the award-winning EnFM360 Digital Transformation Program, delivering enterprise digital capabilities, automation initiatives, intelligent workflows, and self-service platforms that enhanced operational performance, improved customer satisfaction, and accelerated digital adoption across the organization.

## Summary

### EXECUTIVE PROFILE

PMP® Certified Product Owner with 14+ years of experience driving Digital Transformation, AI & Automation, enterprise application delivery, and business process optimization across Facilities Management, Real Estate, Finance, HR, Procurement, and Operations. Experienced in defining product vision, managing product roadmaps and backlogs, and translating business requirements into scalable ERP, CAFM, HRMS, Finance, and Business Intelligence solutions. Skilled in ERP modernization, AI-driven process automation, workflow automation, API integrations, UAE e-Invoicing readiness, Power BI analytics, Microsoft Power Platform, and enterprise system integrations. Proven track record of leading Agile and Waterfall delivery, managing cross-functional stakeholders, and delivering award-winning digital transformation initiatives that improve operational efficiency, governance, user adoption, and measurable business value.

### ACHIEVEMENT DASHBOARD

🏆 MEFMA Digital Transformation of the Year 2024

🏆 Technology & Innovation in FM 2025

🏆 Technology Implementation in FM 2024 & 2025

📈 30% improvement in incident resolution efficiency

💰 25% reduction in IT overall costs

🚀 Led EnFM360 enterprise transformation program

- Provided mentorship and guidance to junior product team members, fostering a culture of knowledge sharing and professional growth.

**Product Consultant / Functional Product Specialist**  
Lattice Software Solutions LLC

Oct 2017 - Aug 2021

- Partnered with enterprise customers and business stakeholders to define product vision, gather requirements, and develop strategic roadmaps for ERP and CAFM platforms aligned with business objectives.
- Owned the product backlog by translating business needs into user stories, prioritizing features, managing UAT and product releases, and collaborating with cross-functional Agile teams to deliver high-value solutions.
- Conducted business analysis workshops and leveraged customer feedback and operational insights to drive continuous product enhancements, improving user experience and operational efficiency.
- Developed and delivered training sessions for clients on product functionalities, improving user adoption and satisfaction.
- Facilitated product demonstrations and training sessions for clients, enhancing user adoption and satisfaction rates.

**Associate Product Analyst / ERP Solutions Specialist**  
Realtime Technologies LLC

Oct 2014 - Sep 2017

- Gathered and analyzed business requirements for ERP modules including Procurement, Inventory, HR, and Finance, translating stakeholder needs into functional specifications and product enhancements.
- Collaborated with business users, developers, and QA teams to design workflows, optimize business processes, and deliver scalable, user-centric solutions.
- Supported Agile product delivery by prioritizing features, coordinating UAT, managing integrations, and ensuring successful product releases aligned with business objectives.
- Assisted in the implementation of ERP systems by configuring software settings and ensuring data integrity throughout the migration process.

**.NET Developer**  
Suntech Business Solutions LLC

Mar 2012 - Sep 2014

- Designed and developed enterprise web applications using ASP.NET and .NET Core frameworks, delivering scalable solutions aligned with business and customer requirements.
- Built and optimized REST APIs, backend services, and SQL Server data layers to improve system performance, reliability, and application scalability.
- Enhanced existing enterprise applications through performance optimization, defect resolution, and continuous improvements to improve user experience and operational efficiency.
